Idaho Industrial Commission (IIC) EDI Claims R3.1 Announcement

IIC EDI Claims R3.1 Information Session Recording and Presentation are Now Available and Reminder Trading Partner (Direct Reporters) and EDI Vendor Testing will begin soon!

June 14, 2022

Idaho, in conjunction with their EDI Claims Vendor, Verisk, have prepared the EDI Claims Release 3.1 Information Session recording which is available in three parts. The PDF slides that correspond to the recordings are also available and these can be found on the Training Information page of the IIC EDI Claims website: https://iicedi.info/training.

This training was prepared to assist Trading Partners in understanding the transition from R3.0 to R3.1 and interpreting the new requirements for the state of Idaho.

The testing period for IIC Trading Partners (Direct SFTP) and EDI Vendors will **begin on June 30, 2022**.

As a reminder, data is deemed of high-test quality if it correctly represents the real-world construct to which it refers. It is recommended that as much as possible, actual FROI and SROI data be used to meet the FROI and SROI testing requirements.

IIC will be utilizing a policy validation tool which will be implemented with the migration to EDI Claims Release 3.1. **The FROI test file must contain true policy data for Insurer FEIN (DN0006) and a related Policy Number Identifier (DN0028) to substantiate the verification process.**

There is no need to create a new IIC Trading Partner Profile (TPP) or update existing profiles prior to testing. However, if reporting changes to the Sender, Receiver, Insurer, Claims Administrator, or transmission protocol, please go to https://iicedi.info/register to make changes.

EDI Vendors and Trading Partners submitting claims data directly are required to complete the Test Plan. The IIC Test Plan is available at https://iicedi.info/impl-info. **Any Direct SFTP trading partner or EDI Vendor who has not completed and passed the FROI/SROI testing will not be advanced to production.**

Exceptions: No testing is required for IIC Web Entry filers using wcPrism. In some cases, if a Trading Partner is using an EDI Vendor, the EDI Vendor will coordinate and/or perform the testing on behalf of the Trading Partner.

Please note the following important information regarding the incoming test files:

- Must contain proper information consistent with the approved method on the TPP
- The Test/Production Indicator (DN0104) located in position 82 of the Header Record should be set to 'T' for all testing

Testing concludes November 23, 2022, and the implementation date for EDI Claims Release 3.1 is December 1, 2022.

If you have any questions related to the Idaho EDI Claims Release 3.1 for First Report of Injury (FROI) and Subsequent Report of Injury (SROI) please email iicedi@iso.com.

Thank you,
